Re: Submission of Test Plans Pursuant to the High Production Volume Testing Program for Diketene Chemical Abstracts Service ("CAS") No. 674-82-8 Methyl Acetoacetate CAS No.105-45-3, and N,N-Dimethylacetoacetamide ("DMAA"), CAS No. 2044-64-6.

Dear Mr. Leavitt:

I am writing on behalf of the Color Pigments Manufacturers Association, Inc. ("CPMA"). The CPMA is an industry trade association representing color pigment companies in Canada, Mexico, and the United States. CPMA represents small, medium, and large color pigments manufacturers throughout Canada, Mexico and United States, accounting for approximately 95% of the production of color pigments in North America. Color Pigments are widely used in product compositions of all kinds, including paints, inks, plastics, glass, synthetic fibers and ceramics. Color pigment manufacturers located in other countries with sales in Canada, Mexico, and the United States, and suppliers of intermediates to the pigments industry are also members of the Association.

With this letter, we are submitting the enclosed Test Plans for the compounds Diketene, Chemical Abstracts Service ("CAS") No. 674-82-8, and Methyl Acetoacetate ("MAA"), CAS No.105-45-3, and N,N-Dimethylacetoacetamide ("DMAA"), CAS No. 2044-64-6.

The sponsoring companies for these Test Plans are:

Lonza Corporation
Eastman Chemical Corporation

Representatives of these two companies make up the Diketene Derivatives Task Force within the CPMA. As discussed in our letter of November 30, 1999:

"CPMA reserves the right to defer review of any chemical under the HPV program where that chemical has been the subject of another commitment to either the EPA-HPV program or other similar programs. CPMA further reserves the right to withdraw from this commitment should the HPV program, when and if finalized, prove to be different from that currently understood by CPMA."

Furthermore, and again as discussed in our letter of November 30, 1999, the CPMA is taking steps to review and categorize the available data for the chemicals sponsored by the CPMA. This effort has required, and will continue to require, considerable time, since many of these products have been produced for over 50 years throughout the world. Additionally, an increasing number of the substances sponsored by the CPMA have become the subject of international efforts under the Organization for Economic Cooperation and Development SIDS program. All testing for such chemicals and structural analogs will be deferred until such time as international SIDS reports are complete.

Therefore, the submission of the enclosed test plans for DMAA, MAA and Diketene does not in any way modify CPMA's previously stated reservations or stated positions with respect to the voluntary HPV program.

All technical questions should be addressed to me at:

Color Pigments Manufacturers Associations, Inc.
Attn: J. Lawrence Robinson, President
Suite 102
300 North Washington Street
Alexandria, Virginia 22314

Telephone: 703/684-4044
Facsimile: 703/684-1795

I will, in turn, forward requests to the appropriate member representatives for review and response. Thank you for your attention in this matter. Please call if there are any questions or comments.

Sincerely,

J. Lawrence Robinson
President
